2018 - 2019

RACL Geartech Limited

WORLD CLASS TECHNOLOGY

Glimpse of Gear Power Honing Technology

“Enabling RACL for drive train parts towards e-mobility solutions”

CHAIRMAN'S MESSAGE

Dear Stakeholders,

I have great pleasure in welcoming you to the 36th Annual General Meeting of your Company. At first I would like to thank our valued shareholders, for your faith and unstinted support, as the pre-eminent position of RACL, where it stands today with glory, is an outcome of the invaluable trust and confidence of our stake holders.

Economic Overview

My fellow shareholders, I would like to congratulate Hon'ble Prime Minister, Shri Narendra Modi, whose vision and commitment to usher in, a New and vibrating India, has reverberated in the hearts and

minds of millions of fellow citizens, who reposed their faith in his capable leadership.

Our Hon'ble Prime Minister has charted out a vision to Make India a US \$ 5 Trillion Economy by 2024. If we see the track record of Economic Growth of our country in past few years, the target set up by Hon'ble Prime Minister seems very well within capabilities of our country. Even though, there is a slowdown in certain segments of Indian Economy, but I am sure it is a temporary phase and shall go off sooner than later. I foresee that newer opportunities for economic growth are set to increase manifold in immediate future, because of various structural reforms being undertaken by the Government. India has a stable political situation as on now and Government is working very seriously on strengthening the foundations of a strong but well regulated business scenario for all times to come. Various long term measures are undertaken by the Government for improving quality of life of all our citizens and reducing the inequality of income particularly for lower strata of the society. I fully endorse the various initiatives taken by the Government and on behalf of the Board, I would like to once again re-pledge RACL's fullest contribution to the Government in its endeavours for building a strong India.

Performance Highlights

Your Company delivered a resilient performance despite a challenging operating environment. On a comparable basis, your company has reported a Total Income of Rs. 190.96 Crores for the financial year ended March 31, 2019 as compared to Rs. 140.11 Crores during the same period in the previous year, representing a growth of 36.29%. Profit before Tax at Rs. 17.34 Crores increased by 100.69% from Rs. 8.64 crores, while Net profit grew by 30.60% to Rs. 9.43 Crores from Rs. 7.22 Crores in FY 2017-18.

Striding towards our Growth Plan

We will continue to invest in enhancing international competitiveness in each business segment, not only, to reinforce the pole position achieved in several segments, but also to speedily attain leadership in the new businesses. While this will undoubtedly entail upfront investments and gestation costs in the short term, it will provide a competitive advantage over a medium to long term period of time.

A multi-pronged approach is being pursued to create growing value for all stakeholders.

Let me now turn to critical growth drivers, which are poised to energise the future of your businesses, namely, the increasing role of Innovation, R&D and world class technology.

Company is gearing up for providing drive train solutions to the future of mobility i.e. Electrical vehicles (EVs). Company has already invested substantial capital expenditure in the recent past and is fully ready, as on today to cater to the high precision drive train components for E-mobility solutions.

Building Sustainable Work Culture

Your Company is investing in building state-of-the-art manufacturing infrastructure across the plant. Our strong corporate culture is fundamental to our business success. Board of Directors of the company is playing a very constructive and pivotal role in re-defining the work environment of the company by promoting values-based code of conduct.

Last but not the least, I would like to turn to one of the most valuable resources on which rests the foundations of all our ambitions and aspirations - your Company's dedicated pool of talent.

RACL is creating a strong work force by continually training them and nurturing their dreams towards creating a healthy and happy life style.

Corporate Social Responsibility (CSR) Focus

RACL Geartech Limited has always believed in sustainable and responsible growth, led by its values. CSR efforts of the company endeavour to support the under privileged rural and urban communities in the country at large, with a focus on sections of the vulnerable and marginalized communities that live in close proximity to its manufacturing facilities.

In Conclusion

The scale, scope, diversity and depth of your Company's operations have increased business over the years. I have had the privilege to participate and have a ringside view of the remarkable transformational voyage traversed across time.

It will also be your Company's untiring endeavour to lead by example as an Enterprise of Tomorrow by pursuing growth strategies that will be responsibly competitive, sustainable and inclusive.

Thank you,

GURSHARAN SINGH

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

RACL Geartech Limited having a fully integrated manufacturing set up, offers complex engineering solutions in the field of Transmission Gears & Shafts, Sub-assemblies, Precision Machined Parts and Industrial Components to domestic as well as global markets. RACL provides unique and innovative automotive products and services that deliver superior measurable values to all stakeholders.

In 2019 our main aim is to come up with products and solutions which help maximize the reach of India's as well as global manufacturing companies. Few of the steps are as under:

- Availability of raw material in its totality.
- Value enhancement to machines.
- Cost effectiveness to production environment.
- Unexpected failures best managed.
- Increasing customer condense.
- Delivering maximum output.

Since the introduction of the smart phone, it has become clear that customers are quick to adopt even highly complex and expensive technology if it makes their lives easier. In other word, users value convenience and ease. These core values turned the automobile into the defining technical cultural item of the 20th century. Now it is time to translate these properties into the context of today's and tomorrow's technology and society.

The automotive industry has the opportunity to shape this fundamental restructuring. When devising strategies and business models, companies should not only consider direct product purchasers but all users and groups affected by transport issues. The automobile has long since changed from a technical to a social commodity, it guarantees our personal mobility and social participation, shape our cities.

Furthermore, India's manufacturing industry has witnessed significant growth owing to multiple government policies and overall push to boost manufacturing in the country. Government of India's Make in India programme has not only given an impetus to domestic player, but also attracted a lot of foreign platform as a hub for manufacturing and this will grow significantly.

With the above customer centric approach, we are successfully supplying to top overseas OEM's like BMW Motorrad – Germany, Kubota Corporation (Japan, Thailand & USA), I.T. Switzerland (SAME Group Company), Piaggio – Italy, Vietnam, KTM AG – Austria, Schneider Electric – Germany, Dana – Italy & China and BRP Rotax – Austria amongst others and in the domestic market we are supplying to Yamaha India, Piaggio Vehicles & SML Isuzu etc.

a) The Global Economy 2018-19 in the field of Automotive Industry:

Overall, the global automotive industry is in better shape than it was five years ago, especially in the US, where profits and sales have recovered following the recent economic crisis, and in China, where growth remains strong. This progress will likely continue. By 2020, global profits for automotive OEMs are expected to rise by almost 50 percent. The new profits will come mainly from growth in emerging markets and, to a lesser extent, the US, Europe, Japan and South Korea will be stagnant in terms of profit growth.

There are four key challenges that OEMs need to address to get a piece of future profitability. The analysis of the report projects to 2020, but these challenges will shape the industry until at least 2025.

- Complexity and cost pressure: There will be more platform sharing and more modular systems. At the same time, regulatory pressures will tighten, and prices in established markets are likely to be flat.
- Diverging markets: OEMs need to adapt to changing regional and segment patterns of supply and demand with respect to their production and supply base foot-prints, supply chains and product portfolios, and the emerging Chinese after sales market offers new growth opportunities.

- Digital Demands: Consumers want more connectivity are focus on active safety and ease of use and are increasingly using digital sources in making their purchase decisions.
- Shifting Industry landscape: Suppliers will add more value in alternative power train technologies and in innovative solutions for active safety; Europe needs to restructure and adjust its capacity to better match demand, and competition is emerging from china.

To capture future growth and find profit from these challenges – and to mitigate their risks – OEMs cannot simply turn to their traditional toolbox. They need to review and adjust their strategic priorities, deploy the appropriate investments and resources, and develop new skills to execute these strategic objectives.

Indian Automotive Sector/ Environment

The Indian automotive industry is seeing significant transformation with respect to its sustainable growth and profitability. The industry is crucial for the economy as it accounts for the economy for 7.1% of the country's Gross Domestic Product (GDP) and as per Automotive Mission Plan (AMP) 2016-26, its contribution is projected to increase to 12%. India is expected to emerge as the world's third largest passenger vehicle market by 2021.

There are a number of key trends that are shaping the industry today, which are expected to have a significant bearing on its ability to realize the objectives of the AMP. In addition to automation of various processes to meet these goals, the sector is also expected to generate additional direct and indirect jobs.

Currently, India's automotive industry is at an inflexion point and is witnessing five megatrends that are expected to transform the industry in a big way:

a) Rapidly evolving customer expectations.

- Changing customer persons.
- High level of product awareness.
- Digitally savvy.
- Surge in corporate customers.

b) Disruptive impact of technology.

- Rapid adoption of technology in vehicles, industry supply chain and business models.
- Disruption through innovative products and services (e.g. shared mobility).

c) Dynamic regulatory environment.

- Regular but uncertain regulatory interventions (GST, shift from BS IV to BS VI, CAFÉ norms, ABS for two-wheelers, higher axle loads in CVs etc.)
- Increasing investments in regulatory compliance by industry players.

d) Changing face of mobility infrastructure

- Efforts to enable electric vehicle infrastructure.
- Investment in roads and highways.
- Shared mobility as an alternative
- Smart cities.

e) Globally interconnect & Industry.

- Indian companies going global
- Next wave of investments from global companies
- Shift in economic power to countries such as India.

In overall the industry has never witnessed this magnitude of multi-dimensional change till now.

b) OPPORTUNITIES & THREATS :

Some of the major opportunities in the automobile sector are as follows:

- a) Rise in middle class income and young population may result in strong growth.
- b) India is expected to become a leader in shared mobility by 2030, providing opportunities for electric and autonomous vehicles. Global market opportunity itself is the ultimate opportunity provided by auto industry.
- c) Shifting focus towards electric cars can also provide opportunities in the sector.
- d) India also has a significant cost advantage that attracts investment in the sector.
- e) The Government aims to develop India as a global manufacturing centre. The Government has also come up with reforms like GST and changes in FDI policies to boost the growth in the sector.
- f) Leverage on product engineering expertise to improve the worthiness and exports of auto components.
- g) The growing need to outsource and growth shifting to Asian Markets, Although American & European market is the pulse of this Industry, but the focus is shifting to developing markets like China, India and other Asian nations because of the rise in disposable income, changing lifestyle & stable economic conditions.
- h) Increasing demand for VFM (Value for Money) Vehicles means more demand of automotive components. The reason of increased demand is basically VFM products would be fuel efficient & high mileage vehicles.

Some of the major threats/weaknesses in the automobile sector are as follows:

- a) Vulnerabilities introduced through lack of manufacturer attention or expertise, combined with competitive pressures and growing product and service complexity.
- b) No software code is 100% bug free – and where there are bugs there can be exploits, Further, with software being written by different developers, installed by different suppliers, and often reporting back to different management platforms, no one player will have visibility of, let alone control over, all of a vehicle's source code.
- c) Connected vehicles will generate and process ever more data – about the vehicle, but also about journeys and even personal data on the occupants – this will be of growing appeal to attackers looking to sell the data on the black market or to use it for extortion and blackmail.
- d) Further, lawmakers will come up with requirements and recommendations for making cyber security a mandatory part of all connected vehicles.
- e) Low investment in Research and Development and Limited knowledge of product liability and offshore warranty handling.
- f) Comparatively poor infrastructure for supply chain and exports.
- g) Bargaining power of consumers: Over the last 3-4 decades the automobile market has shifted from demand to supply market. Availability of large number of variants, stiff competition between them, and long list of alternatives to choose from has given power to customers to choose whatever they like.
- h) Growth rate of Automobile industry is in the hands of the government due to regulations on taxation front, no entry of outside vehicles in the state, decreasing number of validity of registration period & volatility in the fuel prices. These factors always affect the growth of the industry.

All these factors lead to lesser demand of automotive components.

c) Segment-wise performance

The Company has one line of business, namely, manufacturing of gears, shafts and other automotive component parts. The Company has no unit (plant) of production outside India, therefore, there is no geographical segment and no production segment wise information is required.

d) Outlook

The World Economic Forum which assesses the manufacturing capabilities of more than 100 countries, ranks India within 100 countries on the global manufacturing Index.

The Government's "Make in India" initiative has played an important role in elevating country's position. In the past three to four years, India improved on nine out of ten parameters for ease of doing business.

Although there is still a long way to go before India becomes a leader in the manufacturing arena, companies in the automotive sector are embracing this opportunity to leverage India as a hub for low-cost, high-quality products.

e) Risks & Concerns

The company is exposed to external and internal risks associated with the business. The operations of the company are directly dependent on the Automotive manufacturer's (OEMs) growth and business plans. General economic conditions impact the automotive industry and in turn, the operations as well. To counter these risks, company continues to broaden the product portfolio, increase customer base and geographic reach. The company is exposed to strong competitive pressures from both domestic and overseas. RACL established reputation, close customer relationships, ability to provide higher level of engineering, design support and relentless drive for improvement gives it a competitive edge. The company is also exposed to financial risk from changes in interest rates and foreign exchange rates etc.

In order to address the aforesaid risks the company has implemented adequate risk management approach. The Audit Committee of the Company periodically reviews the risk assessment and risk management process. A periodical audit is conducted by the Internal Auditors in all the areas to ensure that the company's control mechanism is properly followed and all statutory requirements are duly complied.

f) Internal Control Systems and their adequacy

The Company has an Internal Control process which aims at providing reasonable assurance on reliability of financial information, compliances with laws and regulations in force and realisation and optimisation of operations. It ensures documentation and evaluation of unit and entity level controls through existing policies and procedures, primarily to identify any significant gaps and define key actions for improvement. Installation of Compliance Mantra system (a software based compliance system) to doubly ensure the enforcement of compliances and various laws on the company.

The Company's internal controls are supplemented by an extensive programme of internal audits, review by management and documented policies, guidelines and procedures. Internal Auditors reports its findings to the Audit Committee and to the Board of Directors on quarterly basis. The internal controls are designed to ensure that financial and other records are reliable for preparing financial information and other data, and for maintaining accountability of assets.

The Audit Committee and the Board of Directors review internal controls and the progress of implementation of the recommendations of internal audits. The management actively implements the recommendations of such reviews.

g) Performance of the Company

In the Financial Year 2018-19, the company achieved an overall income of Rs. 190.96 crore from operations as compared to Rs. 140.11 crore in 2017-18. The company achieved an operating profit of Rs. 17.34 crore (PBT) as compared to Rs. 8.64 crore (PBT) in last year. The company has made a provision of Rs. 7.57 crore on account of Income Tax / Deferred Tax Liabilities.

The company has MAT credit of Rs. 0.94 crore which shall be utilized/ adjusted for payment of Income Tax in future. Company has a Reserve & Surplus of Rs. 56.19 crore as on 31.03.2019 as compared to Rs. 44.74 crore in last year.

The Company continues to make concerted efforts at leveraging relationships with existing customers as well as widening the customer base by adding new customers. The company added TVS Motors in terms of new customers in the financial year 2018-19. However, there were significant requirements for new product development of existing clients. The wider product portfolio was important to build the export business.

RACL Geartech Limited (RACL) continues to service a strong customer base, many of these customers are global players with a domestic presence in India. The Company continues with its effort to strengthen and cement relationships with these customers in the domestic market and explore opportunities to service their global needs. RACL remains positioned globally as a cost competitive manufacturer with focus on quality. Continuous efforts are being undertaken to maintain the highest delivery standards in terms of 'on time' and 'in full'. The larger customer base with wider product portfolio, which is fast emerging as the need of the markets today, increases the challenges on this front. It has introduced a degree of flexibility in its production equipment and is continuously working on improving its planning systems.

EXPORT

In line with the economic trend seen in last year, Export sales of the company leading to rise by approximately 54.10 % from Rs. 71.30 crore in financial year 2017-18 to Rs. 109.87 crore in financial year 2018-19.

The global markets are under stress, RACL has miniscule share of the global pie and there is ample scope and opportunities to grow exports aggressively.

h) HUMAN RESOURCES EFFICIENCY

During the year, the company delivered value to its customers and investors. This was made possible by the relentless efforts of each and every employee. The company has developed a robust and diverse talent pipeline which enhances RACL Geartech Limited organizational capabilities for future readiness, further driving greater employee engagement. Our human resource program is focused on attracting the right talent, providing excellent on the job training opportunities, and finally giving them the growth opportunities consistent with their aspirations.

Company has taken sufficient steps to impart practical training to its work force at all levels. A separate cell in HR function has already been created for imparting such training in the plant itself. In order to encourage the senior staff, they are being deputed to attend Conferences, Seminars, In-house Workshops, so that they are satisfied and bring in knowledge and skills to RACL for mutual benefits.

RACL Geartech Limited has always enjoyed strong industrial relations. The company has a systematic grievance redressal system to further strengthen these relationships. This system encourages employees to share their views and opinion with the management. The company reflects on this feedback and incorporates relevant changes into the existing policies, systems and processes.

The permanent employees strength on pay rolls of your Company as on the end of financial year 31st March, 2019 was 478.

i) Details of Significant changes in Key financial ratios along with explanation

L Share Transfer System

To expedite the process of share transfer, The Board of the Directors has delegated the powers for transfer/ Transmission/ Dematerialization/ Rematerialisation or others to the Committee of Directors i.e. Stakeholders Relationship Committee and to MAS Services Limited [Registrar and Share Transfer Agents (RTA)]. Which conduct the above activities and their reports is submitted to the Board of Directors on regular interval.

The Company has appointed MAS Services Limited as its Registrars and Share Transfer Agents. All share transfers and related operations/ matters or other matters related to shareholders are conducted and monitored by MAS Services Limited, which is registered with the SEBI.

The Company's Registrars, MAS Services Limited have adequate infrastructure to serve the shareholders and process the share transfers. In compliance with the Listing Regulations, every six months the share processing system is audited by a practicing Company Secretary (PCS) and a Certificate to that effect is issued by the said PCS file with the Stock Exchange. The Company's scrip forms part of the SEBI's compulsory demat segment.

Investor correspondence should be addressed to the Registrars and Share Transfer Agents or the Company, as per contact details as given at the end of the Report on Corporate Governance.

M Dematerialisation of shares and liquidity

The Company's scrip forms part of the compulsory demat segment for all investors. To facilitate the investors in having an easy access to the Demat System, the Company has signed up with both the Depositories viz. National Securities Depository Limited (NSDL) and Central Depository Services (India) Limited (CDSL). The connectivity has been established through the Company's Registrars and Share Transfer Agents i.e. MAS Services Limited. INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF RACL Geartech Limited

(Formerly Raunaq Automotive Components Limited)

Report on the audit of the Standalone Ind AS Financial Statements

Opinion

We have audited the Standalone Ind AS financial statements of RACL Geartech Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2019 and the Statement of Profit and Loss (including other comprehensive income), the Statement of Changes in Equity and the Statement of Cash Flows for the year then ended, and notes to the Ind AS financial statements, including a summary of significant accounting policies and other explanatory information for the year ended on that date.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Companies Act, 2013 in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2019, and its profit, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Standalone Ind AS Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Standalone Ind AS financial statements under the provisions of the Companies Act, 2013 and the Rules there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements for the financial year ended 31st March, 2019. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have determined that there are no key audit matters to communicate in our report.

Information Other than the Ind AS Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Business Responsibility Report, Corporate Governance and Shareholder's Information, but does not include the Ind AS financial statements and our auditor's report thereon.

Our opinion on the Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibility of Management and Those Charged with Governance for the Standalone Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Standalone Ind AS financial statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Standalone Ind AS financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but it is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the 'Annexure A' a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

ANNEXURE “B” TO THE INDEPENDENT AUDITOR’S REPORT

(Referred to in our Report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of **RACL GEARTECH LIMITED** (“the Company”) as of March 31, 2019 in conjunction with our audit of the Standalone Ind AS financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (the “Guidance Note”). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the Standalone Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Standalone Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Standalone Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding

prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Standalone Ind AS financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2019, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The details of various employee benefit provided to employee areas under:

Defined Benefit Plans

In accordance with the Payment of Gratuity Act, 1972, the Company provides for gratuity, as defined benefit plan. The gratuity plan provides for a lump sum payment to the employees at the time of separation from the service on completion of vested year of employment i.e. five years. The liability of gratuity plan is provided based on actuarial valuation as at the end of each financial year based on which the Company contributes the ascertained liability to Life Insurance Corporation of India with whom the plan assets are maintained.

These plans typically expose the Company to actuarial risks such as: investment risk, inherent interest rate risk, longevity risk and salary risk, Investment Risk.

Interest Rate Risk The defined benefit obligation calculated uses a discount rate based on government bonds. If bond yields fall, the defined benefit obligation will tend to increase Longevity Risk.

The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

Salary Risk Higher than expected increases in salary will increase the defined benefit obligation.

The most recent actuarial valuation for determining present value of the defined benefit obligation were carried out as at March 31, 2019 by Mr. I Sambasavi Rao (Membership no. 158), Fellow of the Institute of Actuaries of India. The present value of the defined benefit obligation, and the related current service cost, were measured using the projected unit credit method.

The principal assumption used for the purpose of the actuarial valuations were as follows:-

B SIGNIFICANT ACCOUNTING POLICIES

B1 INCOME RECOGNITION

Revenue from Contracts with customers:

The Company has adopted Ind AS 115 “Revenue from Contracts with Customers” with the date of initial application being April 1, 2018. Ind AS 115, revenue from contracts with customers, mandatory for reporting period beginning on or after April 1, 2018 replaced existing revenue recognition requirements i.e. Ind AS 18 Revenue Recognition and Ind AS 11 Construction Contracts. There were no significant adjustments required to the retained earnings as on April 1, 2018. Also the application of IND AS 115 did not have any significant impact on recognition and measurement for revenue and related items in the financial results.

Accordingly, the policy for Revenue is amended as under:

The Company derives revenue primarily from sale of goods to the Customer. To recognize revenue, the Company applies the following five step approach:

(1) Identify the contract with a customer:

The Company observe the following criteria:

- a. Parties to the contract have approved the contract.
- b. Parties are committed to performing their respective obligations.
- c. Each party’s rights and payment for the contract is identified.
- d. A contract has commercial substance.
- e. Probable collection of the consideration by the entity.

(2) Identify the performance obligations in the contract:

The Company assesses its promise to transfer goods to a customer to identify separate performance obligations. The Company applies judgment to determine whether each goods promised to a customer are capable of being distinct, and are distinct in the context of the contract, if not, the promised goods are combined and accounted as a single performance obligation.

(3) Determine the transaction price:

Transaction price is fixed and determined based on the terms of contract and Company’s customary practice and any consideration payable to the customers includes cash amounts, credits, rebates and other similar allowances is reduced from the transaction price.

(4) Allocate the transaction price to the performance obligation in the contract.

The Company allocates the transaction price to each performance obligation identified in a contract on a relative stand-alone selling price basis.

(5) Recognize revenue when a performance obligation is satisfied:

Revenue should be recognised when (or as) the Company satisfies a performance obligation by transferring a promised goods or services to a customer (customer obtains control). For each performance obligation, The Company determine the performance obligation at a point of time when all the following conditions are satisfied:

1. The Company has a present right to pay for the goods.
2. The Customer has legal title to the goods.
3. The Company has transferred physical possession of the goods.
4. Customer has significant risk and reward of ownership.
5. Customer has accepted the goods.

Other Income

Dividend income from investments is recognized when the company's right to receive payment has been established.

Interest income is accrued on, time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

B2 PROPERTY, PLANT AND EQUIPMENT (PPE)

Property, plant and equipment (including furniture, fixtures, vehicles, etc.) held for use in the production or supply of goods or services, or for administrative purposes, are stated in the balance sheet at cost less accumulated depreciation and accumulated impairment losses. Cost of acquisition is inclusive of freight, duties, taxes and other incidental expenses. Freehold land is not depreciated.

Management has reviewed the depreciation policy and machineries have been depreciated accordingly.

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognized impairment loss. Cost includes items directly attributable to the construction or acquisition of the item of property, plant and equipment, and, for qualifying assets, borrowing costs capitalized in accordance with the Company's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Depreciation is recognized so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. Depreciation is charged on a pro-rata basis at the straight line method over estimated economic useful lives of its property, plant and equipment generally in accordance with that provided in the Schedule II to the Act.

Depreciation of an asset begins when it is available for use. Depreciation of an asset ceases at the earlier of the date that the asset is classified as held for sale (or included in a disposal group that it is classified as held for sale) in accordance with Ind AS 105 and the date that the asset is de-recognized. Therefore depreciation does not cease when the asset becomes idle or is retired from active use unless the asset is fully depreciated.

However under usage methods of depreciation the depreciation charge can be zero while there is no production.

Depreciation on additions/ deductions is calculated pro-rata from/ to the month of additions/ deductions.

An item of property, plant and equipment is derecognized upon disposal. Any gain or loss arising on the disposal of an item of property plant and equipment is determined as the difference between the sale proceeds and the carrying amount of the asset and is recognized in the statement of profit and loss. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis

B3 INTANGIBLE ASSETS

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortization and accumulated impairment losses. Amortization is recognized on a straight-line basis over their estimated useful lives. The estimated useful life and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

B4 IMPAIRMENT OF TANGIBLE AND INTANGIBLE ASSETS

The carrying amount of assets are reviewed at each Balance Sheet date, to assess ,if there is any indication

of impairment based on internal/external factors. An asset is impaired when the carrying amount of the assets exceeds the recoverable amount. Recoverable amount is the higher of fair value less costs of disposal and value in use. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount.

An impairment loss is charged to the Profit and Loss Account in the year in which an asset is identified as impaired.

When an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

B5 INVENTORIES :

Inventories are valued at the lower of cost, determined on the weighted average basis and Net Realisable Value (NRV).

The cost of Finished Goods and Work in Progress comprises raw material, direct labour, other direct cost and appropriate proportion of variable and fixed over head expenditure, the latter being allocated on the basis of normal operating capacity. Costs of Inventories also include all the cost incurred in bringing the inventories to their present location and condition. Costs of purchased inventory are determined after deducting rebates and discounts. NRV is the estimated selling price in the ordinary course of business less the estimated costs of completion and estimated cost necessary to make the sale.

B6 FOREIGN CURRENCY TRANSACTIONS :

In preparing the financial statements of the Company, transactions in currencies other than the company's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Exchange differences on monetary items are recognized in profit or loss in the period in which they arise.

Foreign currency derivatives are initially recognized at fair value at the date the derivative contracts are entered into and are subsequently re-measured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedging relationship and the nature of the hedged item.

B7 EMPLOYEES BENEFITS :

Company's contributions paid/ payable during the year to Provident Fund and Employees' State Insurance Corporation (ESIC) are recognized in the Profit & Loss Account; Provident Fund contributions are made to a Trust administered by the company. The interest rate payable to the members of this trust shall not be lower than the statutory rate of interest declared by the Central Government under the Employees Provident Fund and Miscellaneous Provisions Act, 1952 and shortfall, if any, shall be made good by the company. The remaining contributions are made to a Government Administered Employee Pension Fund towards which the company has no further obligations beyond its monthly contributions.

Defined benefits and other long term employee benefits are provided on the basis of actuarial valuation made at the end of each financial year. Actuarial gain or losses arising from such valuation are charged to Other Comprehensive Income in the year in which they arise.

B8 RESEARCH & DEVELOPMENT EXPENDITURE

Expenditure on research activities is recognized as an expense in the period in which it is incurred where no internally generated asset can be recognized.

B9 FINANCIAL INSTRUMENTS

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

Financial Assets

All recognized financial assets are subsequently measured in their entirety at either amortized cost or fair value, depending on the classification of the financial assets

Investments in debt instruments that meet the following conditions are subsequently measured at amortized cost (unless the same are designated as fair value through profit or loss (FVTPL)):

- The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- The contractual terms of instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Debt instruments that meet the following conditions are subsequently measured at fair value through other comprehensive income (unless the same are designated as fair value through profit or loss)

- The asset is held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets; and
- The contractual terms of instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Debt instruments at FVTPL are a residual category for debt instruments and all changes are recognized in profit or loss.

Investments in equity instruments are classified as FVTPL, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in Other Comprehensive Income (OCI) for equity instruments which are not held for trading.

Interest income, dividend income and exchange difference (on debt instrument) on Fair Value Through Other Comprehensive Income (FVTOCI) debt instruments is recognized in profit or loss and other changes in fair value are recognized in OCI and accumulated in other equity. On disposal of debt instruments FVTOCI the cumulative gain or loss previously accumulated in other equity is reclassified to profit & loss. However in case of equity instruments at FVTOCI cumulative gain or loss is not reclassified to profit & loss on disposal of investments.

Financial Liabilities and Equity Instruments

Classification as debt or equity

Debt and equity instruments issued by Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

Financial liabilities

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. The carrying amounts of financial liabilities that are

subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalized as part of costs of an asset is included in the 'Finance Costs' Line item.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability.

- a. Loans and borrowings are subsequently measured at amortized costs using Effective Interest Rate method.
- b. Financial liabilities at fair value through profit or loss (FVTPL) are subsequently measured at fair value.
- c. Financial guarantee contracts are subsequently measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognized less cumulative amortization.
- d. Financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

B10 Impairment of financial assets (Expected Credit Loss Model)

The Company applies the expected credit loss model for recognizing impairment loss on financial assets measured at amortized cost, debt instruments at FVTOCI, lease receivables, trade receivables, other contractual rights to receive cash or other financial asset and financial guarantees not designated at FVTPL

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Credit loss is the difference between all contractual cash flows that are due to the Company in accordance with the contract/agreement and all the cash flows that the Company expects to receive (i.e.. all cash shortfalls), discounted at the original effective interest rate. The Company estimates cash flows by considering all contractual terms of the financial instrument, through the expected life of the financial instrument.

The Company measures the loss allowance for a financial instrument at an amount equal to the life-time expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk has not increased significantly, the Company measures the loss allowance at an amount equal to 12-month expected credit losses. 12-month expected credit losses are portion of the life-time expected credit losses and represent the life-time cash shortfalls that will result if the default occurs within 12 months after the reporting date and thus, are not cash shortfalls that are predicted over the next 12 months.

When making the assessment of whether there has been a significant increase in credit risk since initial recognition, the Company uses the change in the risk of a default occurring over the expected life of the financial instrument instead of a change in the amount of the expected credit loss. To achieve that, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition.

B11 PROVISIONS

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably

B12 Warranties

The estimated liability for product warranties is recorded when products are sold. These estimates are established using historical information on the nature, frequency and average cost of warranty claims and management estimates regarding possible future incidence based on corrective actions on product failures. The timing of outflows will vary as and when warranty claim will arise- being typically six months to one year.

B13 CURRENT AND NON CURRENT CLASSIFICATION

Current Asset:

An asset shall be classified as current when it satisfies any of the following criteria:

- (a) it is expected to be realized in, or is intended for sale or consumption in, the company's normal operating cycle;
- (b) it is held primarily for the purpose of being traded.
- (c) It is expected to be realized within twelve months after the reporting date, or
- (d) It is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

All other assets shall be classified as non-current.

Current Liabilities:

A liability shall be classified as current when it satisfies any of the following criteria:

- (a) it is expected to be settled in the company's normal operating cycle;
- (b) it is held primarily for the purpose of being traded;
- (c) it is due to be settled within twelve months after the reporting date: or
- (d) the company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Terms of a liability that could at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification. All other liabilities shall be classified as non-current.

B14 DEFERRED TAX & CURRENT TAX

Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow

from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax for the year

The income tax expense or credit for the year is the tax payable on current year’s taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

B15 EARNINGS PER SHARE (EPS)

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. For the purpose of calculating Diluted Earnings per Share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential Equity Shares.

C Cash flow statement

Cash flow statement is prepared segregating the cash flows from operating, investing and financing activities. Cash flow from operating activities is reported using indirect method. Under the indirect method, the net profit/(loss) is adjusted for the effects of:

- (a) transactions of a non-cash nature;
- (b) any deferrals or accruals of past or future operating cash receipts or payments and,
- (c) All other items of income or expense associated with investing or financing cash flows.

The cash flows from operating, investing and financing activities of the Company are segregated based on the available information. Cash and cash equivalents (including bank balances) are reflected as such in the Cash Flow Statement. Those cash and cash equivalents which are not available for general use as on the date of Balance Sheet are also included under this category with a specific disclosure.

D Borrowings Cost:

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization. Other borrowing costs are expensed in the period in which they are incurred.
